

# Using WirelessHART™ in Process Industries

**8:00am - 4:30pm: 2nd June 2009 - Manchester United Stadium**

**Join a host of automation professionals to learn how this exciting new technology can help lower your operating costs, reduce downtime and move your company from a costly scheduled maintenance strategy to a cost-effective predictive maintenance strategy.**

The special one-day FREE educational seminar on WirelessHART™ technology, the first interoperable wireless communication standard for the process industries, is presented by industry specialists from the Hart Communication Foundation (HCF), ABB, Endress+Hauser, Emerson, Pepperl+Fuchs and Siemens.

## **Agenda**

- An introduction to wireless technology
- What WirelessHART™ technology can do for you
- An overview of WirelessHART™ technology
- Using WirelessHART™
- Planning a wireless project
- Live WirelessHART™ demonstrations to support the presentations

## **Who should attend?**

- Automation professionals interested in using or learning about WirelessHART™ technology in their machines, process applications or industrial facilities
- Engineering contractors who are designing applications, plants and facility upgrades
- Engineering and shop floor staff who need to gain experience and exchange information about maintenance, asset management, advanced diagnostics and commissioning tools

**Endress+Hauser**

People for Process Automation

**EMERSON**  
Process Management
